Status of the Claims

Claims 1-20 have been presented for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method of modulating DXR activity with a modulator, classified in class 435, subclass 189+.
- II. Claims 12-16, drawn to a method of treating diseases with a DXR inhibitor, classified in class 514, subclasses 125 and 129, for example.
- III. Claims 17-20, drawn to a method of disinfecting a surface with a DXR inhibitor, classified in class 210, subclass 131, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are each drawn to different uses of a functionally defined product, an inhibitor of DXR: inhibiting an enzyme, treating a disease, and sterilizing a surface. A search for one of these uses would not necessarily lead to or render obvious the other uses.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1651

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
